DEPARTMENT OF TRANSPORTATION U.S. COAST GUARD CG-3303C-14 (Rev. 11-02)

## RECORD OF PERFORMANCE QUALIFICATIONS IT

## **INSTRUCTIONS**

Record of Performance Qualifications shall be completed for enlisted personnel of the Coast Guard as outlined in the Enlisted Performance Qualifications Manual, COMDTINST M1414.8 (series). As proficiency in each performance qualification is demonstrated by actually performing the task listed, the DATE and INITIALS column shall be completed. Personnel are required to demonstrate proficiency in all new performance qualifications assigned to their rating. Performance qualifications previously demonstrated, dated and initialed off will not be recertified. Some performance qualifications include intent statements to help clarify the requirements of the task that is to be performed.

.02 INSTALL the following ancillary equipment in accordance with National Electric Code (NEC), Electronic Industries Alliance (EIA), Telecommunication Industry Association (TIA) standards, the Electronics Manual, COMDTINST M10550.25 (series) and manufacturer's technical manuals.		
<ul> <li>a. Routers</li> <li>b. Hubs</li> <li>c. Data Switches</li> <li>d. UPS</li> <li>e. Encryption Devices</li> <li>f. Bit Drivers</li> <li>g. Media Converters</li> <li>h. HDSL Units</li> </ul>		

RATING	: INFORMATION SYSTEMS TECHNICIAN	INIT	DATE
4.03	<b>INSTALL</b> the following premise distribution systems in accordance with the National Electric Code (NEC), Electronic Industries Alliance (EIA), Telecommunication Industry Association (TIA) standards and the equipment manufacturer's technical manuals.		
	<b>INTENT</b> : Member should be able to pull, terminate, and test cable and fiber.		
	<ul><li>a. Category 5 Horizontal Cabling</li><li>b. Category 5 Backbone Cabling</li><li>c. Fiber Optic Cabling</li></ul>		
4.04	Given five separate network casualties, <b>ISOLATE</b> each casualty in accordance with current TISCOM documentation, MCSE: TCP/IP Study Guide (Microsoft Press), and manufacturer's technical troubleshooting procedures.		
	INTENT: Member is to use all available tools to systematically identify circuit or equipment failures and take appropriate corrective action.		
4.05	Given a restored network casualty, <b>PERFORM</b> operational checks in accordance with current TISCOM documentation, MCSE: TCP/IP Study Guide (Microsoft Press), and manufacturer's technical manuals.		
	<b>INTENT</b> : Member is to validate the operation of circuits from end-user to end-user after notification by repair technicians that the circuit has been restored, i.e. radio check after repair of a radio landline circuit; send an email after restoration of CGDN+; etc.		
5.01	<b>CONDUCT</b> traffic analyses for voice and data networks to provide current and future needs in accordance with current TISCOM documentation, ITU-T Recommendation E.500 Traffic Intensity Measurement Principles and E.492 Traffic Reference Period, Voice Over IP Fundamentals (Cisco Press), and manufacturer's technical manuals.		
	<b>INTENT</b> : Member should be able to identify methods of voice and data traffic load measurement, grades of service, traffic types and sampling methods.		
5.02	Given separate unique network casualties, <b>RESTORE</b> each casualty in accordance with current TISCOM documentation, MCSE TCP/IP Study Guide (Microsoft Press), and manufacturer's technical manual.		
	INTENT: Member is to use all available tools to systematically identify circuit or equipment failures and take appropriate corrective action.		
NAME	(Last, First, Middle Initial)	SOCIAL S	ECURITY NO.
